

STAGE 2™

The Service Standard

586.665.7500 | service@proper.net

Molds built in other parts of the world often need final maturation before starting mass production. PGT Technology Group is fully equipped to support everything needed. Our PGT Service, Tooling Group and CST Texture Group make us uniquely capable to handle your full project from start to finish.

- Disassembly, surface treatment, surface finishing
- Mold component testing including water, ejection, hot runners
- Quality inspection experts – mold tryouts, testing, including CMM and laser scanning
- Engineering change and corrections as needed
- In-house tryout support including verification of cycle times and product specifications
- Full texture capability in-house with CST Studio
- Clean your molds
- Storage management for your molds.
